

Steps to becoming GDPR-compliant

GDPR Compliance

Understand Your Data

Define & classify your data

Know exactly where your data is stored

Map out your data flow

Conduct Data Risk Assessment

Where are your data vulnerabilities?

How risky is holding that data for your business?

Why does your business need this data?

Protect Your Data

Secure your IT infrastructure

Ensure secure company processes e.g. encrypt all files containing data

Ensure you have a data breach Action Plan in place

Control & Monitor Your Data

Control who can access your data

Monitor data behaviour, e.g. types of data being transferred

Monitor IT network for threats
